Power interruption in parts of Leyte on October 3, 2011

The National Grid Corporation of the Philippines (NGCP) restored power transmission services in parts of Leyte on Monday, October 3, 2011 after re-energizing the Babatngon-Abucay 69 kV Transmission Line.

Leyte II Electric Cooperative, Inc. (LEYECO II) experienced power interruption from 3:01PM to 7:25PM.

NGCP line patrol personnel reported that the outage was caused by a tree that leaned towards the transmission line in Brgy. Bagacay, Tacloban City. The tree was said to be intentionally cut by an unidentified person.

Among the areas affected by the power interruption were Tacloban City and the municipalities of Palo and Babatngon.
